Disposition Authority N1/306/98/3/3 et al.  
**COMMENTS**

Of the 72 boxes listed by WNRC for transfer to NARA Archives II, 17 have not been reviewed by the Department of State. They have been lined out on the list attachment to the SF 258. State will order these boxes from WNRC and review them.

State records do not indicate that the 16 boxes of item 306-72D-4904 have been reviewed, but since they are unclassified and deal only with the USIA Book Program, they are unlikely to contain any national security information requiring review under E.O. 12958.

Tom-

~~N1-306-88-2: Look at the microfiche in 2100. Not yet on-line.~~

~~III-500/571/7A1: Formal directives, Procedures, etc. The USIA manual cites back to GRS 16/1A, which was operative at the time the manual was done. That GRS was then rescinded for permanent records but USIA never submitted a schedule to cover the records. I recommended to the leadership that we just accession the records since USIA is dead.~~

Let me know if any of this is not clear.

David

Hi David,

If you have some time I was wondering if you could help me find two Disposition Authority numbers (and the 115's) I've been looking for? I have looked everywhere possible and Marina Reid helped me, etc. We saw your memo on one of them. We even looked them up online but they were not there as far as I could tell. Are they classified? The one with your memo is:

III-500/571/7A1 (Accession Number: 306-83-27, boxes 1-10)

and the other is:

~~N1/306/88/2/4 (Accession Number: 306-88-0154, boxes 1-2).~~

I would appreciate any help.

**Record Group/Collection #:** 0306  
**Description:** Directive Case Files

**# of Containers:** 10      **Cubic Feet:** 10.77

**Inclusive Start Date:** 1970      **Inclusive End Date:** 1982

**Comments:** No Lot File Number. No SF-115 is available. As per David Langbart, "the USIA manual cites back to GRS 16/1A, which was operative at the time the manual was done. That GRS was then rescinded for permanent records but USIA never submitted a schedule to cover the records. I recommended to the leadership that we just accession the records since USIA was dead."

Tom-

~~N1-306-88-2: Look at the microfiche in 2100. Not yet on-line.~~

III-500/571/7A1: Formal directives, Procedures, etc. The USIA manual cites back to GRS 16/1A, which was operative at the time the manual was done. That GRS was then rescinded for permanent records but USIA never submitted a schedule to cover the records. I recommended to the leadership that we just accession the records since USIA is dead.

Let me know if any of this is not clear.

David

Hi David,

If you have some time I was wondering if you could help me find two Disposition Authority numbers (and the 115's) I've been looking for? I have looked everywhere possible and Marina Reid helped me, etc. We saw your memo on one of them. We even looked them up online but they were not there as far as I could tell. Are they classified? The one with your memo is:

III-500/571/7A1 (Accession Number: 306-83-27, boxes 1-10)

and the other is:

~~N1/306/88/2/14 (Accession Number: 306-88-0154, boxes 1-2).~~

I would appreciate any help.

# INSTRUCTIONS

This form may be initiated by either the transferring agency or a Federal records center.

## INITIATED BY AGENCY:

Agency completes items 1 through 6 (see specific instructions below). Item 6 must be signed and dated. Send original and 4 copies to the appropriate address in item 2 sixty days before planned date of transfer.

## INITIATED BY FEDERAL RECORDS CENTER:

Federal records center completes items 1, 2, 3A-F, if known, 4B, 5A and B, D and E and sends original and 3 copies to transferring agency records officer.

Agency completes/corrects items 3, 5A, 5C-F, and 6. Item 6 must be signed and dated. Agency sends original and 3 copies to the address indicated in item 2 sixty days before planned date of transfer.

## ITEM 1, TYPE OF ACTION:

If 1B is checked, a reference to the records control schedule number or NARS appraisal job number must be included in 5E. (Item 1B may be checked for unscheduled records if an appropriate appraisal job is cited to reflect an accretion according to prior evaluation of the series).

## ITEM 2, TO:

When 1B is checked, requests are sent to the National Archives (NNA) unless the records control schedule or appraisal job specifies a regional archives or Presidential library.

When 2C is checked, include in that block address (number and street, city, State, and zip code) of the regional archives branch being offered the records.

## ITEM 3, UNIT THAT CREATED THE RECORDS:

Fully identify the agency, subdivision, and unit that created or originated the records (not the agency records office). If this is not possible, or a successor unit or agency is transferring the records, then explain under Agency Remarks, item 5F.

## ITEM 4, CURRENT LOCATION OF RECORDS:

Identify the agency location or the particular records center in which the records are located and provide FRC accession number. The stack location in the center may also be provided.

## ITEM 5, RECORDS DATA:

5A. Describe the records. If the records are in a Federal records center, attach SF 135. Arrangement statement must be provided and enough description to substantiate responses in items 5B (with volume for each item) 5C and 5D.

5B. Estimated volume may be indicated in either cubic feet or cubic meters.

5C. Privacy Act notices must be cited for records subject to the Privacy Act (5 U.S.C. 552a) and should be attached.

5D. Specific restrictions must be fully justified and may not violate the Freedom of Information Act (5 U.S.C. 552).

5E. If the records have previously been scheduled in a records control schedule, the schedule and item number must be cited, and the schedule itself may be attached. If the records are not scheduled but a part of the series has been appraised as permanent in the past and transferred to a NARS depository, then cite the appraisal job number as authority and treat as a scheduled offer.

## ITEM 6, STATEMENT OF AGENCY REPRESENTATIVE:

Signature and title of agency records officer is placed here and normally is not the name or office given in item 3.

## ITEM 7, ACTION TAKEN BY NARS:

NARS will indicate approval and provide shipping or delivery instructions, or disapproval and recommend appropriate disposition of the records. NARS will indicate quantity of offer approved, disapproved and for which action is deferred.

If NARS approves the transfer, the Office of the National Archives sends SF 258 to the agency (or to the Federal records center if the records are in a center) with a transfer date and shipping or delivery.

If NARS disapproves the transfer, the Records Disposition Division returns SF 258 to the agency with suggestions for disposition of the records.

## ITEM 8, RECORDS RECEIVED:

After receipt of records by a NARS depository NARS will sign and return one copy of SF 258 to the agency.

## ITEM 2, TO:

When 1B is checked, requests are sent to the National Archives (NNA) unless the records control schedule or appraisal job specifies a regional archives or Presidential library.

When 2C is checked, include in that block address (number and street, city, State, and zip code) of the regional archives branch being offered the records.

## ITEM 3, UNIT THAT CREATED THE RECORDS:

5D. Specific restrictions must be fully justified and may not violate the Freedom of Information Act (5 U.S.C. 552).

5E. If the records have previously been scheduled in a records control schedule, the schedule and item number must be cited, and the schedule itself may be attached. If the records are not scheduled but a part of the series has been appraised as permanent in the past and transferred to a NARS depository, then cite the appraisal job number as authority and treat as a scheduled offer.

## ITEM 6, STATEMENT OF AGENCY REPRESENTATIVE:

# INSTRUCTIONS

This form may be initiated by either the transferring agency or a Federal records center.

## INITIATED BY AGENCY:

Agency completes items 1 through 6 (see specific instructions below). Item 6 must be signed and dated. Send original and 4 copies to the appropriate address in item 2 sixty days before planned date of transfer.

## INITIATED BY FEDERAL RECORDS CENTER:

Federal records center completes items 1, 2, 3A-F, if known, 4B, 5A and B, D and E, and sends original and 3 copies to transferring agency records officer.

Agency completes/corrects items 3, 5A, 5C-F, and 6. Item 6 must be signed and dated. Agency sends original and 3 copies to the address indicated in item 2 sixty days before planned date of transfer.

## ITEM 1, TYPE OF ACTION:

If 1B is checked, a reference to the records control schedule number or NARS appraisal job number must be included in 5E. (Item 1B may be checked for unscheduled records if an appropriate appraisal job is cited to reflect an accretion according to prior evaluation of the series).

## ITEM 2, TO:

When 1B is checked, requests are sent to the National Archives (NNB) unless the records control schedule or appraisal job specifies a regional archives or Presidential library.

When 2C is checked, include in that block address (number and street, city, State, and zip code) of the regional archives branch being offered the records.

## ITEM 3, UNIT THAT CREATED THE RECORDS:

Fully identify the agency, subdivision, and unit that created or originated the records (not the agency records office). If this is not possible, or a successor unit or agency is transferring the records, then explain under Agency Remarks, item 5F.

## ITEM 4, CURRENT LOCATION OF RECORDS:

Identify the agency location or the particular records center in which the records are located and provide FRC accession number. The stack location in the center may also be provided.

## ITEM 5, RECORDS DATA:

5A. Describe the records. If the records are in a Federal records center, attach SF 135. Arrangement statement must be provided and enough description to substantiate responses in items 5B (with volume for each item) 5C and 5D.

5B. Estimated volume may be indicated in either cubic feet or cubic meters.

5C. Privacy Act notices must be cited for records subject to the Privacy Act (5 U.S.C. 552a) and should be attached.

5D. Specific restrictions must be fully justified and may not violate the Freedom of Information Act (5 U.S.C. 552).

5E. If the records have previously been scheduled in a records control schedule, the schedule and item number must be cited, and the schedule itself may be attached. If the records are not scheduled but a part of the series has been appraised as permanent in the past and transferred to a NARS depository, then cite the appraisal job number as authority and treat as a scheduled offer.

## ITEM 6, STATEMENT OF AGENCY REPRESENTATIVE:

Signature and title of agency records officer is placed here and normally is not the name or office given in item 3.

## ITEM 7, ACTION TAKEN BY NARS:

NARS will indicate approval and provide shipping or delivery instructions, or disapproval and recommend appropriate disposition of the records. NARS will indicate quantity of offer approved, disapproved and for which action is deferred.

If NARS approves the transfer, the Office of the National Archives sends SF 258 to the agency (or to the Federal records center if the records are in a center) with a transfer date and shipping or delivery.

If NARS disapproves the transfer, the Records Disposition Division returns SF 258 to the agency with suggestions for disposition of the records.

## ITEM 8, RECORDS RECEIVED:

After receipt of records by a NARS depository NARS will sign and return one copy of SF 258 to the agency.

SUBJECT: Loose Ends on Shipment to NARA of Research Records

Although we are nearing the end of the major backlog of research materials to be sent to NARA, there are several loose ends from previous shipments that should be taken care of before the next groups of boxes are ready for delivery:

1) The first item, attached, with copies, is a corrected Form SF-258, to replace (or be attached to) the original sent to NARA on 5/17/88 and accepted by them in June as Job Number NN3-306-88-5. This corrects the description of the material in the 31 (not 30) boxes covered by the form as research reports (output), not project records -- an entirely separate schedule item. The other three box groups picked up at the same time (Nos. NN3-306-88-6, 7 and 8) were all project materials.

NN3-306-88-5 is one of a series of shipments of research reports, which originally were not to go to NARA until 25 years old. This shipment included some "pre-USIA" reports and the first ten years of the Office of Research output (1954-63), due under the old schedule (N1-306-80-1, Item 7) in 1988. It will be supplemented shortly by the rest of the report backlog through 1982, due at NARA under the new schedule (N1-306-87-8, Item 7) when four instead of 25 years old.

To help clarify any possible confusion: as you know, project materials contain raw data and background technical information on individual studies (usually contracted surveys). Under the new schedule (N1-306-87-8, Item 9) project records (now called "data collection projects") are to be sent to NARA when two years old. The distinction between reports (research output) and project records is important not only because of the difference in age at submission but also because NARA processors probably handle non-machine-readable records differently from tapes and documentation. Moreover, there is no firm or necessary connection between the report and project records: while reports are often based on data obtained from research projects, they may actually cover several projects at once or none at all; likewise, project data may appear in one or myriad reports.

2) Secondly, as a result of the revised schedule, steps can now be taken to see that the three shipments of 1975-80 reports sent to the Records Center (WRC) in 1985 are turned over to NARA. The Accession Numbers for these are 306-85-0012, 0013 and 0014 (a total of four boxes). In checking over the SF-135s, however, I note that they carry a restriction code of C or R. With the exception of one "M" report (M-5-77) which is still classified and should be filed separately if found in the box, all these reports are now fully declassified and can go to NARA as the others have done with no restrictions on public use. Please let me know if the transfer can go forward without any further action by R/TS. (If it does, we would eventually appreciate getting confirmation copies, with location numbers.)

To accompany the 1975-80 series reports to be transferred from WRC, attached are three sets of updated report lists (one for you and two for NARA). The original lists enclosed in the boxes were preliminary, hand-done checklists, while these have been checked and updated in the same computer-ready format as those sent with the 1953-63 report shipment in June. (NB: The "N" series in this shipment actually begins in 1973, the "B" series with 1979.)

3) The third item attached is a copy for NARA of M-14-78, "Highlights of Media Usage Study in Libreville, Gabon, 1977". According to my records, this report was missing from the collection sent to WRC in 1985 but was found in our final check and review. It should be inserted in the single box comprising Accession No. 306-85-0012, either before or after transfer to NARA.

4) Finally, attached are three copies each (for you and NARA) of four replacement pages for the 1953-63 "S" report list sent in June. Three fix small clerical errors, while the fourth corrects a confusion in the original list between a 1954 research bibliography of some 2,000 pages, which is out of print except for a short summary paper, and an updated one done in 1969. Thus the big four-volume set labeled S-37-54 in the June shipment should be removed -- it is the updated version and belongs in S-40-69, which NARA will get shortly (we are including another set in the 1969 box).

\* \* \* \* \*

The lists for most of the upcoming report shipments have been completed, and the boxes will be checked and sealed shortly. I will send the necessary SF-258s as soon as possible after the above loose ends are under control.

There will also soon be one more shipment of project materials (for 1964-73), which will clean up that backlog through 1980. This will be done separately, perhaps through Heidi Zimmer (with your concurrence). We still await a contractor to handle the complete project materials for 1981-86, but NARA is getting the tapes and the most important documentation promptly from Elaine Farmer.

I think this brings you up to date on current problems and promises. Let me know if you have any questions.

**Authority for maintenance of the system:**

E.O. 10450, Security Requirements for Government Employees, in particular sections 2, 3, 4, 5, 6, 7, 8, 9, and 14; E.O. 12333, United States Intelligence Activities, in particular paragraphs 1.1(c), 1.1(d), 1.12(d), 2.3, 2.4, and 2.6; the National Security Act of 1947, as amended; 10 U.S.C. 3013; the Defense Authorization Act for FY 1988 and 1989; the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 401) and E.O. 9397 (SSN).

**Purpose(s):**

To provide information to assess an individual's acceptability for assignment to or retention in sensitive positions consistent with the interest of national security; to document U.S. Intelligence, counterintelligence and security investigations and operations pertaining to the U.S. Army's responsibilities for counterintelligence, and to detect, identify, and neutralize foreign intelligence and international terrorist threats to the DoD; and to temporarily document security, suitability, and criminal incident information not within U.S. Army counterintelligence jurisdiction to investigate, which is lawfully provided to U.S. Army counterintelligence units by cooperating sources of information collected incidental to the counterintelligence mission.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as routine uses

pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Immigration and Naturalization Service, Department of Justice for use in alien admission and naturalization inquiries conducted under section 105 of the Immigration and Naturalization Act of 1952, as amended.

To the Department of Veterans Affairs for use in benefit determinations.

The 'Blanket Routine Uses' published at the beginning of the Army's compilation of systems of records notices also apply to this system. The distribution of investigative information is based on the Army's evaluation of the requesting agency's needs and the relevance of the information to the use for which it is provided. Information collected for one purpose is not automatically used for other purposes or by the other users indicated in this description.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:**

Maintained on paper records in file folders, audio or audiovisual tapes, microimaging, optical digital data disk, computers, and computer output products.

**Retrievability:**

By name, aliases, or title in combination with social security number or regular dossier number, military service number for prisoners of war and U.S. service persons declared missing in action, date and or place of birth. For those subjects who have no identifying data other than the name, the name only index is searched. Additionally, a nonstandard search is required. The name only index will provide a subject's name and dossier number only. The nonstandard search will provide a listing of all subjects with identifying data. In some instances, some other identifying data must be furnished such as address. Dossiers possibly identical with the subject may be forwarded to the requester.

**Safeguards:**

Buildings employ alarms, security guards, and or rooms are security controlled areas accessible only to authorized persons. Paper and microform records are maintained in General Service Administration approved security containers. Paper and microform records in the IRR are stored in security controlled areas accessible only to authorized persons. Electronically and optically stored records are maintained in 'fail-safe' system software with password protected access. Records are accessible only to authorized persons with a need-to-know who are properly screened, cleared, and trained.

**Retention and disposal:**

Personnel security/adjudicative records on non-DoD persons who are considered for affiliation with DoD are destroyed after 1 year if affiliation is not completed.

Personnel security investigations and adjudicative records of a routine nature are retained in the active file until no longer needed; retired to the U.S. Army Investigative Records Repository (IRR) and retained for 15 years after last action reflected in the file, except that files which contain significant derogatory information and or resulted in adverse action(s) against the individual are destroyed after 25 years. However, once affiliation is terminated, acquiring and adding material to the file is prohibited unless affiliation is renewed. Records determined to be of historical value, of wide spread value, or Congressional interest and investigations of treason, spying, espionage, sabotage, sedition, and subversion or other major investigations or operations of a counterintelligence or security nature are permanent. They will be retained in the IRR for 25 years after the date of the last action reflected in the file and then permanently transferred to the National Archives.

Records pertaining to U.S. persons declared POW, missing, or detainees will be maintained in the active file until no longer needed, retired to the IRR and retained for 50 years after the date of the last action reflected in the file or the subject is declared Killed in Action or dead and then permanently transferred to the National Archives.

Records pertaining to counterintelligence polygraph technical files will be maintained in the active file until no longer needed and then disposed of after the final quality control review as follows: (1) for counterintelligence scope cases, 90 days for favorably resolved cases or 15 years for other than favorably resolved cases, (2) for counterintelligence investigative cases, 15 years, and (3) for offensive counterintelligence operations and Human Intelligence cases, material is transferred to the IRR, incorporated into an operational dossier, and disposed of according to the disposition guidance for the operational file under system notice A0381-100aDAMI.

Security, suitability, and criminal incident information that is collected in the performance of the counterintelligence mission and which is not within the U.S. Army counterintelligence jurisdiction to investigate is retained at the location only so long as necessary to transmit it to the appropriate law enforcement or investigative agency having jurisdiction for this incident.

Summarized records pertaining to local intelligence, counterintelligence or incidents of interest to the local military intelligence activity are reviewed annually and destroyed when determined to be of no further operational value.

Destruction of records will be by shredding, burning, or pulping for paper records; magnetic erasing for computerized records. Optical digital data records should not be destroyed pending the development of a satisfactory destruction method.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000A is an artificial accession number used for consolidation/identification purposes. Thirteen (13) accessions of POW/MIA/Detainee and Foreign Organizations and Personnel Files are consolidated under this transaction into two new records series and an accretion to an existing series. All thirteen accessions have been previously accessioned and appear in the MLR, but this transaction replaces those entries with two new entries and accretion to an existing entry. The two new series and accretion to an existing series are as follows:

- (A1 1844) POW/MIA/Detainee Intelligence Files (World War II-Pacific Theater), 1944-1986. 9 LGA-S boxes. 3 linear feet, 6 linear inches. (New Series)
- (A1 1843) POW/MIA/Detainee Intelligence Files (World War II-European Theater). 1944-1986. 5 LGA-S boxes. 2 linear feet, 1 linear inch. (New Series)
- (A1 134B) Security Classified Intelligence and Investigative Dossiers-Personal Name File, 1939-1976. 62 LGA-S Boxes (Boxes 697-756). 25 linear feet, 10 linear inches. (Accretion to existing series)

**Authority for maintenance of the system:**

E.O. 10450, Security Requirements for Government Employees, in particular sections 2, 3, 4, 5, 6, 7, 8, 9, and 14; E.O. 12333, United States Intelligence Activities, in particular paragraphs 1.1(c), 1.1(d), 1.12(d), 2.3, 2.4, and 2.6; the National Security Act of 1947, as amended; 10 U.S.C. 3013; the Defense Authorization Act for FY 1988 and 1989; the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 401) and E.O. 9397 (SSN).

**Purpose(s):**

To provide information to assess an individual's acceptability for assignment to or retention in sensitive positions consistent with the interest of national security; to document U.S. Intelligence, counterintelligence and security investigations and operations pertaining to the U.S. Army's responsibilities for counterintelligence, and to detect, identify, and neutralize foreign intelligence and international terrorist threats to the DoD; and to temporarily document security, suitability, and criminal incident information not within U.S. Army counterintelligence jurisdiction to investigate, which is lawfully provided to U.S. Army counterintelligence units by cooperating sources of information collected incidental to the counterintelligence mission.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as routine uses

pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Immigration and Naturalization Service, Department of Justice for use in alien admission and naturalization inquiries conducted under section 105 of the Immigration and Naturalization Act of 1952, as amended.

To the Department of Veterans Affairs for use in benefit determinations.

The 'Blanket Routine Uses' published at the beginning of the Army's compilation of systems of records notices also apply to this system. The distribution of investigative information is based on the Army's evaluation of the requesting agency's needs and the relevance of the information to the use for which it is provided. Information collected for one purpose is not automatically used for other purposes or by the other users indicated in this description.

### **Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

#### **Storage:**

Maintained on paper records in file folders, audio or audiovisual tapes, microimaging, optical digital data disk, computers, and computer output products.

#### **Retrievability:**

By name, aliases, or title in combination with social security number or regular dossier number, military service number for prisoners of war and U.S. service persons declared missing in action, date and or place of birth. For those subjects who have no identifying data other than the name, the name only index is searched. Additionally, a nonstandard search is required. The name only index will provide a subject's name and dossier number only. The nonstandard search will provide a listing of all subjects with identifying data. In some instances, some other identifying data must be furnished such as address. Dossiers possibly identical with the subject may be forwarded to the requester.

#### **Safeguards:**

Buildings employ alarms, security guards, and or rooms are security controlled areas accessible only to authorized persons. Paper and microform records are maintained in General Service Administration approved security containers. Paper and microform records in the IRR are stored in security controlled areas accessible only to authorized persons. Electronically and optically stored records are maintained in 'fail-safe' system software with password protected access. Records are accessible only to authorized persons with a need-to-know who are properly screened, cleared, and trained.

#### **Retention and disposal:**

Personnel security/adjudicative records on non-DoD persons who are considered for affiliation with DoD are destroyed after 1 year if affiliation is not completed.

Personnel security investigations and adjudicative records of a routine nature are retained in the active file until no longer needed; retired to the U.S. Army Investigative Records Repository (IRR) and retained for 15 years after last action reflected in the file, except that files which contain significant derogatory information and or resulted in adverse action(s) against the individual are destroyed after 25 years. However, once affiliation is terminated, acquiring and adding material to the file is prohibited unless affiliation is renewed. Records determined to be of historical value, of wide spread value, or Congressional interest and investigations of treason, spying, espionage, sabotage, sedition, and subversion or other major investigations or operations of a counterintelligence or security nature are permanent. They will be retained in the IRR for 25 years after the date of the last action reflected in the file and then permanently transferred to the National Archives.

Records pertaining to U.S. persons declared POW, missing, or detainees will be maintained in the active file until no longer needed, retired to the IRR and retained for 50 years after the date of the last action reflected in the file or the subject is declared Killed in Action or dead and then permanently transferred to the National Archives.

Records pertaining to counterintelligence polygraph technical files will be maintained in the active file until no longer needed and then disposed of after the final quality control review as follows: (1) for counterintelligence scope cases, 90 days for favorably resolved cases or 15 years for other than favorably resolved cases, (2) for counterintelligence investigative cases, 15 years, and (3) for offensive counterintelligence operations and Human Intelligence cases, material is transferred to the IRR, incorporated into an operational dossier, and disposed of according to the disposition guidance for the operational file under system notice A0381-100aDAMI.

Security, suitability, and criminal incident information that is collected in the performance of the counterintelligence mission and which is not within the U.S. Army counterintelligence jurisdiction to investigate is retained at the location only so long as necessary to transmit it to the appropriate law enforcement or investigative agency having jurisdiction for this incident.

Summarized records pertaining to local intelligence, counterintelligence or incidents of interest to the local military intelligence activity are reviewed annually and destroyed when determined to be of no further operational value.

Destruction of records will be by shredding, burning, or pulping for paper records; magnetic erasing for computerized records. Optical digital data records should not be destroyed pending the development of a satisfactory destruction method.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000A is an artificial accession number used for consolidation/identification purposes. Thirteen (13) accessions of POW/MIA/Detainee and Foreign Organizations and Personnel Files are consolidated under this transaction into two new records series and an accretion to an existing series. All thirteen accessions have been previously accessioned and appear in the MLR, but this transaction replaces those entries with two new entries and accretion to an existing entry. The two new series and accretion to an existing series are as follows:

-(A1 1844) POW/MIA/Detainee Intelligence Files (World War II-Pacific Theater), 1944-1986. 9 LGA-S boxes. 3 linear feet, 6 linear inches. (New Series)

-(A1 1843) POW/MIA/Detainee Intelligence Files (World War II-European Theater). 1944-1986. 5 LGA-S boxes. 2 linear feet, 1 linear inch. (New Series)

-(A1 134B) Security Classified Intelligence and Investigative Dossiers-Personal Name File, 1939-1976. 62 LGA-S Boxes (Boxes 697-756). 25 linear feet, 10 linear inches. (Accretion to existing series)

The thirteen accessions consolidated under this transaction are as follows:

#### **Authority for maintenance of the system:**

E.O. 10450, Security Requirements for Government Employees, in particular sections 2, 3, 4, 5, 6, 7, 8, 9, and 14; E.O. 12333, United States Intelligence Activities, in particular paragraphs 1.1(c), 1.1(d), 1.12(d), 2.3, 2.4, and 2.6; the National Security Act of 1947, as amended; 10 U.S.C. 3013; the Defense Authorization Act for FY 1988 and 1989; the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 401) and E.O. 9397 (SSN).

#### **Purpose(s):**

To provide information to assess an individual's acceptability for assignment to or retention in sensitive positions consistent with the interest of national security; to document U.S. Intelligence, counterintelligence and security investigations and operations pertaining to the U.S. Army's responsibilities for counterintelligence, and to detect, identify, and neutralize foreign intelligence and international terrorist threats to the DoD; and to temporarily document security, suitability, and criminal incident information not within U.S. Army counterintelligence jurisdiction to investigate, which is lawfully provided to U.S. Army counterintelligence units by cooperating sources of information collected incidental to the counterintelligence mission.

#### **Routine uses of records maintained in the system, including categories of users and the purposes of such uses:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as routine uses

pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Immigration and Naturalization Service, Department of Justice for use in alien admission and naturalization inquiries conducted under section 105 of the Immigration and Naturalization Act of 1952, as amended.

To the Department of Veterans Affairs for use in benefit determinations.

The 'Blanket Routine Uses' published at the beginning of the Army's compilation of systems of records notices also apply to this system. The distribution of investigative information is based on the Army's evaluation of the requesting agency's needs and the relevance of the information to the use for which it is provided. Information collected for one purpose is not automatically used for other purposes or by the other users indicated in this description.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:**

Maintained on paper records in file folders, audio or audiovisual tapes, microimaging, optical digital data disk, computers, and computer output products.

**Retrievability:**

By name, aliases, or title in combination with social security number or regular dossier number, military service number for prisoners of war and U.S. service persons declared missing in action, date and or place of birth. For those subjects who have no identifying data other than the name, the name only index is searched. Additionally, a nonstandard search is required. The name only index will provide a subject's name and dossier number only. The nonstandard search will provide a listing of all subjects with identifying data. In some instances, some other identifying data must be furnished such as address. Dossiers possibly identical with the subject may be forwarded to the requester.

**Safeguards:**

Buildings employ alarms, security guards, and or rooms are security controlled areas accessible only to authorized persons. Paper and microform records are maintained in General Service Administration approved security containers. Paper and microform records in the IRR are stored in security controlled areas accessible only to authorized persons. Electronically and optically stored records are maintained in 'fail-safe' system software with password protected access. Records are accessible only to authorized persons with a need-to-know who are properly screened, cleared, and trained.

**Retention and disposal:**

Personnel security/adjudicative records on non-DoD persons who are considered for affiliation with DoD are destroyed after 1 year if affiliation is not completed.

Personnel security investigations and adjudicative records of a routine nature are retained in the active file until no longer needed; retired to the U.S. Army Investigative Records Repository (IRR) and retained for 15 years after last action reflected in the file, except that files which contain significant derogatory information and or resulted in adverse action(s) against the individual are destroyed after 25 years. However, once affiliation is terminated, acquiring and adding material to the file is prohibited unless affiliation is renewed. Records determined to be of historical value, of wide spread value, or Congressional interest and investigations of treason, spying, espionage, sabotage, sedition, and subversion or other major investigations or operations of a counterintelligence or security nature are permanent. They will be retained in the IRR for 25 years after the date of the last action reflected in the file and then permanently transferred to the National Archives.

Records pertaining to U.S. persons declared POW, missing, or detainees will be maintained in the active file until no longer needed, retired to the IRR and retained for 50 years after the date of the last action reflected in the file or the subject is declared Killed in Action or dead and then permanently transferred to the National Archives.

Records pertaining to counterintelligence polygraph technical files will be maintained in the active file until no longer needed and then disposed of after the final quality control review as follows: (1) for counterintelligence scope cases, 90 days for favorably resolved cases or 15 years for other than favorably resolved cases, (2) for counterintelligence investigative cases, 15 years, and (3) for offensive counterintelligence operations and Human Intelligence cases, material is transferred to the IRR, incorporated into an operational dossier, and disposed of according to the disposition guidance for the operational file under system notice A0381-100aDAMI.

Security, suitability, and criminal incident information that is collected in the performance of the counterintelligence mission and which is not within the U.S. Army counterintelligence jurisdiction to investigate is retained at the location only so long as necessary to transmit it to the appropriate law enforcement or investigative agency having jurisdiction for this incident.

Summarized records pertaining to local intelligence, counterintelligence or incidents of interest to the local military intelligence activity are reviewed annually and destroyed when determined to be of no further operational value.

Destruction of records will be by shredding, burning, or pulping for paper records; magnetic erasing for computerized records. Optical digital data records should not be destroyed pending the development of a satisfactory destruction method.

**Authority for maintenance of the system:**

E.O. 10450, Security Requirements for Government Employees, in particular sections 2, 3, 4, 5, 6, 7, 8, 9, and 14; E.O. 12333, United States Intelligence Activities, in particular paragraphs 1.1(c), 1.1(d), 1.12(d), 2.3, 2.4, and 2.6; the National Security Act of 1947, as amended; 10 U.S.C. 3013; the Defense Authorization Act for FY 1988 and 1989; the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 401) and E.O. 9397 (SSN).

**Purpose(s):**

To provide information to assess an individual's acceptability for assignment to or retention in sensitive positions consistent with the interest of national security; to document U.S. Intelligence, counterintelligence and security investigations and operations pertaining to the U.S. Army's responsibilities for counterintelligence, and to detect, identify, and neutralize foreign intelligence and international terrorist threats to the DoD; and to temporarily document security, suitability, and criminal incident information not within U.S. Army counterintelligence jurisdiction to investigate, which is lawfully provided to U.S. Army counterintelligence units by cooperating sources of information collected incidental to the counterintelligence mission.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as routine uses

pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Immigration and Naturalization Service, Department of Justice for use in alien admission and naturalization inquiries conducted under section 105 of the Immigration and Naturalization Act of 1952, as amended.

To the Department of Veterans Affairs for use in benefit determinations.

The 'Blanket Routine Uses' published at the beginning of the Army's compilation of systems of records notices also apply to this system. The distribution of investigative information is based on the Army's evaluation of the requesting agency's needs and the relevance of the information to the use for which it is provided. Information collected for one purpose is not automatically used for other purposes or by the other users indicated in this description.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:**

Maintained on paper records in file folders, audio or audiovisual tapes, microimaging, optical digital data disk, computers, and computer output products.

**Retrievability:**

By name, aliases, or title in combination with social security number or regular dossier number, military service number for prisoners of war and U.S. service persons declared missing in action, date and or place of birth. For those subjects who have no identifying data other than the name, the name only index is searched. Additionally, a nonstandard search is required. The name only index will provide a subject's name and dossier number only. The nonstandard search will provide a listing of all subjects with identifying data. In some instances, some other identifying data must be furnished such as address. Dossiers possibly identical with the subject may be forwarded to the requester.

**Safeguards:**

Buildings employ alarms, security guards, and or rooms are security controlled areas accessible only to authorized persons. Paper and microform records are maintained in General Service Administration approved security containers. Paper and microform records in the IRR are stored in security controlled areas accessible only to authorized persons. Electronically and optically stored records are maintained in 'fail-safe' system software with password protected access. Records are accessible only to authorized persons with a need-to-know who are properly screened, cleared, and trained.

**Retention and disposal:**

Personnel security/adjudicative records on non-DoD persons who are considered for affiliation with DoD are destroyed after 1 year if affiliation is not completed.

Personnel security investigations and adjudicative records of a routine nature are retained in the active file until no longer needed; retired to the U.S. Army Investigative Records Repository (IRR) and retained for 15 years after last action reflected in the file, except that files which contain significant derogatory information and or resulted in adverse action(s) against the individual are destroyed after 25 years. However, once affiliation is terminated, acquiring and adding material to the file is prohibited unless affiliation is renewed. Records determined to be of historical value, of wide spread value, or Congressional interest and investigations of treason, spying, espionage, sabotage, sedition, and subversion or other major investigations or operations of a counterintelligence or security nature are permanent. They will be retained in the IRR for 25 years after the date of the last action reflected in the file and then permanently transferred to the National Archives.

Records pertaining to U.S. persons declared POW, missing, or detainees will be maintained in the active file until no longer needed, retired to the IRR and retained for 50 years after the date of the last action reflected in the file or the subject is declared Killed in Action or dead and then permanently transferred to the National Archives.

Records pertaining to counterintelligence polygraph technical files will be maintained in the active file until no longer needed and then disposed of after the final quality control review as follows: (1) for counterintelligence scope cases, 90 days for favorably resolved cases or 15 years for other than favorably resolved cases, (2) for counterintelligence investigative cases, 15 years, and (3) for offensive counterintelligence operations and Human Intelligence cases, material is transferred to the IRR, incorporated into an operational dossier, and disposed of according to the disposition guidance for the operational file under system notice A0381-100aDAMI.

Security, suitability, and criminal incident information that is collected in the performance of the counterintelligence mission and which is not within the U.S. Army counterintelligence jurisdiction to investigate is retained at the location only so long as necessary to transmit it to the appropriate law enforcement or investigative agency having jurisdiction for this incident.

Summarized records pertaining to local intelligence, counterintelligence or incidents of interest to the local military intelligence activity are reviewed annually and destroyed when determined to be of no further operational value.

Destruction of records will be by shredding, burning, or pulping for paper records; magnetic erasing for computerized records. Optical digital data records should not be destroyed pending the development of a satisfactory destruction method.

REMARKS: NN3-319-02-000A. RG 319, Records of the Army Staff, 1903-1992.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000A is an artificial accession number used for consolidation/identification purposes. Thirteen (13) accessions of POW/MIA/Detainee and Foreign Organizations and Personnel Files are consolidated under this transaction into two new records series and an accretion to an existing series. All thirteen accessions have been previously accessioned and appear in the MLR, but this transaction replaces those entries with two new entries and accretion to an existing entry. The two new series and accretion to an existing series are as follows:

-(A1 1844) POW/MIA/Detainee Intelligence Files (World War II-Pacific Theater), 1944-1986. 9 LGA-S boxes. 3 linear feet, 6 linear inches. (New Series)

-(A1 1843) POW/MIA/Detainee Intelligence Files (World War II-European Theater). 1944-1986. 5 LGA-S boxes. 2 linear feet, 1 linear inch. (New Series)

-(A1 134B) Security Classified Intelligence and Investigative Dossiers-Personal Name File, 1939-1976. 62 LGA-S Boxes (Boxes 697-756). 25 linear feet, 10 linear inches. (Accretion to existing series)

inadvertent disclosure statements; notification of denial, suspension, or revocation of clearance; and reports of casualty, biographic data and intelligence/counterintelligence debriefing reports concerning U.S. personnel who are missing, captured, or detained by a hostile entity. Case control and management documents that serve as the basis for conducting the investigation such as documents requesting the investigation and documents used in case management and control such as lead sheets, other field tasking documents, and transfer forms. Administrative records required by the U.S. Army Investigative Records Repository (IRR) for records management purposes such as form transmitting investigative or operational material to the IRR and providing instructions for indexing the record in the Defense Central Index of Investigations [Defense Clearance and Investigations Index] (System Notice V5-02) and release of material contained therein, form indicating dossier has been reviewed and all material therein conforms to DoD policy regarding retention criteria, form pertaining to the release of information pertaining to controlled records, form to indicate material has been removed and forwarded to other authorized Federal agencies such as the Defense Investigative Service, cross reference sheet to indicate the removal of investigative documents requiring limited access, form identifying material that has been segregated and or is exempt from release, and records accounting for the disclosure of intelligence, counterintelligence and security information made outside of the DoD.

Paper and automated indices of personnel investigations/operations which are under controlled access within the IRR, such as key USAINSCOM personnel, general officers, file procurement officers and their agencies, and sensitive spying, treason, espionage, sabotage, sedition, and subversion investigations and/or counterintelligence operations.

Microform and automated indices and catalogue files, which constitute an index to all IRR holdings contained in microfilmed investigative and operational records.

Automated record indices maintained by the IRR to keep a record of all original dossiers charged out of the IRR on loan to user agencies or permanently transferred to National Archives and Records Administration.

Paper, card file, microform and computerized case and incident indices containing name, date/place of birth, address, case or incident title and number, and brief summary of case or incident of current interest to investigative activities.

#### **Authority for maintenance of the system:**

E.O. 10450, Security Requirements for Government Employees, in particular sections 2, 3, 4, 5, 6, 7, 8, 9, and 14; E.O. 12333, United States Intelligence Activities, in particular paragraphs 1.1(c), 1.1(d), 1.12(d), 2.3, 2.4, and 2.6; the National Security Act of 1947, as amended; 10 U.S.C. 3013; the Defense Authorization Act for FY 1988 and 1989; the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 401) and E.O. 9397 (SSN).

#### **Purpose(s):**

To provide information to assess an individual's acceptability for assignment to or retention in sensitive positions consistent with the interest of national security; to document U.S. Intelligence, counterintelligence and security investigations and operations pertaining to the U.S. Army's responsibilities for counterintelligence, and to detect, identify, and neutralize foreign intelligence and international terrorist threats to the DoD; and to temporarily document security, suitability, and criminal incident information not within U.S. Army counterintelligence jurisdiction to investigate, which is lawfully provided to U.S. Army counterintelligence units by cooperating sources of information collected incidental to the counterintelligence mission.

#### **Routine uses of records maintained in the system, including categories of users and the purposes of such uses:**

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as routine uses

pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Immigration and Naturalization Service, Department of Justice for use in alien admission and naturalization inquiries conducted under section 105 of the Immigration and Naturalization Act of 1952, as amended.

To the Department of Veterans Affairs for use in benefit determinations.

The 'Blanket Routine Uses' published at the beginning of the Army's compilation of systems of records notices also apply to this system. The distribution of investigative information is based on the Army's evaluation of the requesting agency's needs and the relevance of the information to the use for which it is provided. Information collected for one purpose is not automatically used for other purposes or by the other users indicated in this description.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:**

Maintained on paper records in file folders, audio or audiovisual tapes, microimaging, optical digital data disk, computers, and computer output products.

**Retrievability:**

By name, aliases, or title in combination with social security number or regular dossier number, military service number for prisoners of war and U.S. service persons declared missing in action, date and or place of birth. For those subjects who have no identifying data other than the name, the name only index is searched. Additionally, a nonstandard search is required. The name only index will provide a subject's name and dossier number only. The nonstandard search will provide a listing of all subjects with identifying data. In some instances, some other identifying data must be furnished such as address. Dossiers possibly identical with the subject may be forwarded to the requester.

**Safeguards:**

Buildings employ alarms, security guards, and or rooms are security controlled areas accessible only to authorized persons. Paper and microform records are maintained in General Service Administration approved security containers. Paper and microform records in the IRR are stored in security controlled areas accessible only to authorized persons. Electronically and optically stored records are maintained in 'fail-safe' system software with password protected access. Records are accessible only to authorized persons with a need-to-know who are properly screened, cleared, and trained.

**Retention and disposal:**

Personnel security/adjudicative records on non-DoD persons who are considered for affiliation with DoD are destroyed after 1 year if affiliation is not completed.

Personnel security investigations and adjudicative records of a routine nature are retained in the active file until no longer needed; retired to the U.S. Army Investigative Records Repository (IRR) and retained for 15 years after last action reflected in the file, except that files which contain significant derogatory information and or resulted in adverse action(s) against the individual are destroyed after 25 years. However, once affiliation is terminated, acquiring and adding material to the file is prohibited unless affiliation is renewed. Records determined to be of historical value, of wide spread value, or Congressional interest and investigations of treason, spying, espionage, sabotage, sedition, and subversion or other major investigations or operations of a counterintelligence or security nature are permanent. They will be retained in the IRR for 25 years after the date of the last action reflected in the file and then permanently transferred to the National Archives.

Records pertaining to U.S. persons declared POW, missing, or detainees will be maintained in the active file until no longer needed, retired to the IRR and retained for 50 years after the date of the last action reflected in the file or the subject is declared Killed in Action or dead and then permanently transferred to the National Archives.

Records pertaining to counterintelligence polygraph technical files will be maintained in the active file until no longer needed and then disposed of after the final quality control review as follows: (1) for counterintelligence scope cases, 90 days for favorably resolved cases or 15 years for other than favorably resolved cases, (2) for counterintelligence investigative cases, 15 years, and (3) for offensive counterintelligence operations and Human Intelligence cases, material is transferred to the IRR, incorporated into an operational dossier, and disposed of according to the disposition guidance for the operational file under system notice A0381-100aDAMI.

Security, suitability, and criminal incident information that is collected in the performance of the counterintelligence mission and which is not within the U.S. Army counterintelligence jurisdiction to investigate is retained at the location only so long as necessary to transmit it to the appropriate law enforcement or investigative agency having jurisdiction for this incident.

Summarized records pertaining to local intelligence, counterintelligence or incidents of interest to the local military intelligence activity are reviewed annually and destroyed when determined to be of no further operational value.

Destruction of records will be by shredding, burning, or pulping for paper records; magnetic erasing for computerized records. Optical digital data records should not be destroyed pending the development of a satisfactory destruction method.

REMARKS: NN3-319-02-000A. RG 319, Records of the Army Staff, 1903-1992.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000A is an artificial accession number used for consolidation/identification purposes. Thirteen (13) accessions of POW/MIA/Detainee and Foreign Organizations and Personnel Files are consolidated under this transaction into two new records series and an accretion to an existing series. All thirteen accessions have been previously accessioned and appear in the MLR, but this transaction replaces those entries with two new entries and accretion to an existing entry. The two new series and accretion to an existing series are as follows:

-(A1 1844) POW/MIA/Detainee Intelligence Files (World War II-Pacific Theater), 1944-1986. 9 LGA-S boxes. 3 linear feet, 6 linear inches. (New Series)

-(A1 1843) POW/MIA/Detainee Intelligence Files (World War II-European Theater). 1944-1986. 5 LGA-S boxes. 2 linear feet, 1 linear inch. (New Series)

-(A1 134B) Security Classified Intelligence and Investigative Dossiers-Personal Name File, 1939-1976. 62 LGA-S Boxes (Boxes 697-756). 25 linear feet, 10 linear inches. (Accretion to existing series)

The thirteen accessions consolidated under this transaction are as follows:

REMARKS: NN3-319-02-000C. RG 319, Records of the Army Staff, 1903-1992.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000C is an artificial accession number used for consolidation/identification purposes. Two (2) accessions of POW/MIA/Detainee Files, NN3-319-01-005 and NN3-319-01-008, are consolidated under this transaction into one accretion to an existing series. Both jobs have been previously accessioned and appear in the MLR, but this transaction replaces those entries with an accretion to an existing series. The accretion to the series is:

-(A1 219) POW/MIA/Detainee Intelligence Files (Korean Conflict), 1944-1986. 94 LGA-S boxes (Boxes 777-870). 39 linear feet, 2 linear inches. (accretion to existing series) (Total series volume is now 362 linear feet, 6 linear inches, comprising a total of 773 LGA-S boxes and 7 LTA-S boxes)

The new consolidated accretion to an existing series consists of a total of 94 LGA-S boxes, totaling 47.376 cubic feet. This re-measurement results in a net increase of 8.604 cubic feet (previous total volume was 38.772 cubic feet).

REMARKS: NN3-319-02-000B. RG 319, Records of the Army Staff, 1903-1992.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000B is an artificial accession number used for consolidation/identification purposes. Two (2) accessions of POW/MIA/Detainee Files, NN3-319-01-006 and NN3-319-01-007, are consolidated under this transaction into one new records series. Both jobs have been previously accessioned and appear in the MLR, but this transaction replaces those entries with one new entry. The new series is:

-(A1 1844) POW/MIA/Detainee Intelligence Files (Vietnam Conflict), 1944-1986. 121 LGA-S boxes. 50 linear feet, 1 linear inch.

The new consolidated series consists of a total of 121 LGA-S boxes, totaling 60.984 cubic feet. This re-measurement results in a net increase of 10.365 cubic feet (previous total volume was 50.619 cubic feet).

REMARKS: NN3-319-02-000B. RG 319, Records of the Army Staff, 1903-1992.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000B is an artificial accession number used for consolidation/identification purposes. Two (2) accessions of POW/MIA/Detainee Files, NN3-319-01-006 and NN3-319-01-007, are consolidated under this transaction into one new records series. Both jobs have been previously accessioned and appear in the MLR, but this transaction replaces those entries with one new entry. The new series is:

-(A1 1844) POW/MIA/Detainee Intelligence Files (Vietnam Conflict), 1944-1986. 121 LGA-S boxes. 50 linear feet, 1 linear inch.

The new consolidated series consists of a total of 121 LGA-S boxes, totaling 60.984 cubic feet. This re-measurement results in a net increase of 10.365 cubic feet (previous total volume was 50.619 cubic feet).

REMARKS: NN3-319-02-000C. RG 319, Records of the Army Staff, 1903-1992.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000C is an artificial accession number used for consolidation/identification purposes. Two (2) accessions of POW/MIA/Detainee Files, NN3-319-01-005 and NN3-319-01-008, are consolidated under this transaction into one accretion to an existing series. Both jobs have been previously accessioned and appear in the MLR, but this transaction replaces those entries with an accretion to an existing series. The accretion to the series is:

-(A1 219) POW/MIA/Detainee Intelligence Files (Korean Conflict), 1944-1986. 94 LGA-S boxes (Boxes 777-870). 39 linear feet, 2 linear inches. (accretion to existing series) (Total series volume is now 362 linear feet, 6 linear inches, comprising a total of 773 LGA-S boxes and 7 LTA-S boxes)

The new consolidated accretion to an existing series consists of a total of 94 LGA-S boxes, totaling 47.376 cubic feet. This re-measurement results in a net increase of 8.604 cubic feet (previous total volume was 38.772 cubic feet).
