# INSTRUCTIONS

This form may be initiated by either the transferring agency or a Federal records center.

## INITIATED BY AGENCY:

Agency completes items 1 through 6 (see specific instructions below). Item 6 must be signed and dated. Send original and 4 copies to the appropriate address in item 2 sixty days before planned date of transfer.

## INITIATED BY FEDERAL RECORDS CENTER:

Federal records center completes items 1, 2, 3A-F; if known, 4B, 5A and B, D and E and sends original and 3 copies to transferring agency records officer.

Agency completes/corrects items 3, 5A, 5C-F, and 6. Item 6 must be signed and dated. Agency sends original and 3 copies to the address indicated in item 2 sixty days before planned date of transfer.

## ITEM 1, TYPE OF ACTION:

If 1B is checked, a reference to the records control schedule number or NARS appraisal job number must be included in 5E. (Item 1B may be checked for unscheduled records if an appropriate appraisal job is cited to reflect an accretion according to prior evaluation of the series).

## ITEM 2, TO:

When 1B is checked, requests are sent to the National Archives (NNB) unless the records control schedule or appraisal job specifies a regional archives or Presidential library.

When 2C is checked, include in that block address (number and street, city, State, and zip code) of the regional archives branch being offered the records.

## ITEM 3, UNIT THAT CREATED THE RECORDS:

Fully identify the agency, subdivision, and unit that created or originated the records (not the agency records office). If this is not possible, or a successor unit or agency is transferring the records, then explain under Agency Remarks, item 5F.

## ITEM 4, CURRENT LOCATION OF RECORDS:

Identify the agency location or the particular records center in which the records are located and provide FRC accession number. The stack location in the center may also be provided.

## ITEM 5, RECORDS DATA:

5A. Describe the records. If the records are in a Federal records center, attach SF 135. Arrangement statement must be provided and enough description to substantiate responses in items 5B (with volume for each item) 5C and 5D.

5B. Estimated volume may be indicated in either cubic feet or cubic meters.

5C. Privacy Act notices must be cited for records subject to the Privacy Act (5 U.S.C. 552a) and should be attached.

5D. Specific restrictions must be fully justified and may not violate the Freedom of Information Act (5 U.S.C. 552).

5E. If the records have previously been scheduled in a records control schedule, the schedule and item number must be cited, and the schedule itself may be attached. If the records are not scheduled but a part of the series has been appraised as permanent in the past and transferred to a NARS depository, then cite the appraisal job number as authority and treat as a scheduled offer.

## ITEM 6, STATEMENT OF AGENCY REPRESENTATIVE:

Signature and title of agency records officer is placed here and normally is not the name or office given in item 3.

## ITEM 7, ACTION TAKEN BY NARS:

NARS will indicate approval and provide shipping or delivery instructions, or disapproval and recommend appropriate disposition of the records. NARS will indicate quantity of offer approved, disapproved and for which action is deferred.

If NARS approves the transfer, the Office of the National Archives sends SF 258 to the agency (or to the Federal records center if the records are in a center) with a transfer date and shipping or delivery.

If NARS disapproves the transfer, the Records Disposition Division returns SF 258 to the agency with suggestions for disposition of the records.

## ITEM 8, RECORDS RECEIVED:

After receipt of records by a NARS depository NARS will sign and return one copy of SF 258 to the agency.

This collection of records appears to have been accumulated by a succession of U.S. Army offices dealing with POW/MIA affairs. While some of the documentation is original, much of it consists of photocopied material or information copies utilized for reference purposes. The arrangement of the files is sometimes arbitrary and frequently inconsistent. In addition, the folder titles are not always indicative of the document content within.

There is a wide variety of record types which includes administrative correspondence; reports and studies; case files on individual POW's and MIA's; POW/MIA rosters and lists; statistical compilations of casualties; Army pamphlets, handbooks, regulations and plans dealing with POW/MIA matters; newsclippings; logs of telephone calls; and photographs. Files relate to such subjects as the Army's administrative policies and procedures, the fate of individual POW's and MIA's and the Army's relations with their next of kin, reports of sightings and identifications of remains, the 1972-73 repatriation of POW's by means of operations EGRESS-RECAP and HOMECOMING, POW awards and debriefings, and allegations of prisoner misconduct. A few files relate to casualties not connected with the Conflict in Southeast Asia
16. Type of Materials: case files; clippings; letters; lists; logs; memorandums; messages; pamphlets; regulations; reports; rosters

#### POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

##### STORAGE:

Maintained on paper records in file folders, audio or audiovisual tapes, microimaging, optical digital data disk, computers, and computer output products.

##### RETRIEVABILITY:

By name, aliases, or title in combination with social security number or regular dossier number; military service number for prisoners of war and U.S. service persons declared missing in action, date and or place of birth. For those subjects who have no identifying data other than the name, the name only index is searched. Additionally, a nonstandard search is required. The name only index will provide a subject's name and dossier number only. The nonstandard search will provide a listing of all subjects with identifying data. In some instances, some other identifying data must be furnished such as address. Dossiers possibly identical with the subject may be forwarded to the requester.

##### SAFEGUARDS:

Buildings employ alarms, security guards, and or rooms are security controlled areas accessible only to authorized persons. Paper and microform records are maintained in General Service Administration approved security containers. Paper and microform records in the IRR are stored in security controlled areas accessible only to authorized persons. Electronically and optically stored records are maintained in 'fail-safe' system software with password protected access. Records are accessible only to authorized persons with a need-to-know who are properly screened, cleared, and trained.

##### RETENTION AND DISPOSAL:

Personnel security/adjudicative records on non-DoD persons who are considered for affiliation with DoD are destroyed after 1 year if affiliation is not completed.

Personnel security investigations and adjudicative records of a routine nature are retained in the active file until no longer

needed; retired to the U.S. Army Investigative Records Repository (IRR) and retained for 15 years after last action reflected in the file, except that files which contain significant derogatory information and or resulted in adverse action(s) against the individual are destroyed after 25 years. However, once affiliation is terminated, acquiring and adding material to the file is prohibited unless affiliation is renewed. Records determined to be of historical value, of wide spread value, or Congressional interest and investigations of treason, spying, espionage, sabotage, sedition, and subversion or other major investigations or operations of a counterintelligence or security nature are permanent. They will be retained in the IRR for 25 years after the date of the last action reflected in the file and then permanently transferred to the National Archives.

Records pertaining to U.S. persons declared POW, missing, or detainees will be maintained in the active file until no longer needed, retired to the IRR and retained for 50 years after the date of the last action reflected in the file or the subject is declared Killed in Action or dead and then permanently transferred to the National Archives.

Records pertaining to counterintelligence polygraph technical files will be maintained in the active file until no longer needed and then disposed of after the final quality control review as follows: (1) for counterintelligence scope cases, 90 days for favorably resolved cases or 15 years for other than favorably resolved cases, (2) for counterintelligence investigative cases, 15 years, and (3) for offensive counterintelligence operations and Human Intelligence cases, material is transferred to the IRR, incorporated into an operational dossier, and disposed of according to the disposition guidance for the operational file under system notice A0381-100aDAML.

Security, suitability, and criminal incident information that is collected in the performance of the counterintelligence mission and which is not within the U.S. Army counterintelligence jurisdiction to investigate is retained at the location only so long as necessary to transmit it to the appropriate law enforcement or investigative agency having jurisdiction for this incident.

Summarized records pertaining to local intelligence, counterintelligence or incidents of interest to the local military intelligence activity are reviewed annually and destroyed when determined to be of no further operational value.

Destruction of records will be by shredding, burning, or pulping for paper records; magnetic erasing for computerized records. Optical digital data records should not be destroyed pending the development of a satisfactory destruction method.

REMARKS: NN3-319-02-000A. RG 319, Records of the Army Staff, 1903-1992.

902d Military Intelligence Group, Investigative Records Repository (IRR).

NN3-319-02-000A is an artificial accession number used for consolidation/identification purposes. Thirteen (13) accessions of POW/MIA/Detainee and Foreign Organizations and Personnel Files are consolidated under this transaction into two new records series and an accretion to an existing series. All thirteen accessions have been previously accessioned and appear in the MLR, but this transaction replaces those entries with two new entries and accretion to an existing entry. The two new series and accretion to an existing series are as follows:

-(A1 1844) POW/MIA/Detainee Intelligence Files (World War II-Pacific Theater), 1944-1986. 9 LGA-S boxes. 3 linear feet, 6 linear inches. (New Series)

-(A1 1843) POW/MIA/Detainee Intelligence Files (World War II-European Theater). 1944-1986. 5 LGA-S boxes. 2 linear feet, 1 linear inch. (New Series)

-(A1 134B) Security Classified Intelligence and Investigative Dossiers-Personal Name File, 1939-1976. 62 LGA-S Boxes (Boxes 697-756). 25 linear feet, 10 linear inches. (Accretion to existing series)

The thirteen accessions consolidated under this transaction are as follows:

NOTE: Located at the beginning of the series.**SCOPE AND CONTENT NOTE:** This series consists of security-classified files, now declassified in part, that were collected in the Office of the Secretary of the Air Force, Dr. Robert Seamans, during 1972. These records comprise many kinds of documents, including: memos, correspondence, reports, transcripts of hearings, and budget papers. They concern a vast array of sensitive topics, including, among others: air bases; budget matters; relations with foreign countries and air forces; satellites; electronic warfare; air-to-air combat; command-and-control; search and rescue; research and development of new aircraft and weapons; schools that teach escape and evasion techniques; plans for the aerial defense of the United States; Air National Guard and Air Force Reserve; combat operations in Vietnam; personnel matters; and official travel. Among these records is also a fascinating study of the brief but bloody civil war in Jordan in 1970 between the government of Jordan and the Palestinians.

These records were collected in two parts: Boxes 1-6 were arranged according to a numerical filing system; Boxes 7-11 were arranged according to a different, numerical filing system, in which each number is preceded by the letter D. No key to these filing systems is present in the records. Although these filing systems are different, both collected the same kinds of documents on the same subjects. This broad overlap of nature, subjects, and dates, plus their identical provenance makes it possible to describe them together. A researcher who wishes to make a comprehensive search of a given topic should search this entire entry, using the available folder list.

Many of the folders are out of order, because they went through the declassification and indexing processes in that order. Once records have been databased for declassification, they must remain in that order thereafter. In the first filing system, the vast majority of records have been removed because of their classified content. It is possible that in the future, some of these records might be returned to the files, as they too, become declassified. In the second filing system, a surprisingly large number of records have been released to the public.
